COMBAT PAD RETROFIT KIT

The Combat Pad Retrofit Kit offers the most technologically advanced suspension system available today. This technology was originally developed for the US SOCOM and other Tier 1 first responders. The suspension system (padding) is a rate and temperature sensitive material that conforms to wearer's unique head shape. These materials provide unparalleled comfort, fit, and stability. The padding is covered in a heat and moisture wicking anti-microbial fabric. It is designed to draw perspiration away from the head and will actually cool the wearer through this evaporative process.

Improved comfort

Padding conforms to wearers individual head geometry, eliminating hot spots.

Improved Blunt Impact Protection

Our suspension technologies have shown to provide significantly better blunt impact protection than standard OEM padding.

Moisture Wicking

NanoTech fabric wicks heat and moisture away from wearer, creating a natural cooling effect.

BALLISTIC SHIELDS

OLYMPIA BOMB DISPOSAL SUIT

The Olympia bomb suit is United Shield's latest and most advanced design. It is a complete EOD/IEDD ensemble and provides the highest levels of protection from the four main threats encountered by EOD/IEDD operators (fragmentation, overpressure, impact and heat).

The outer material is constructed from certified flame retardant material, such as Nomex® Delta T. This material can also be used to cover the bomb suit helmet, providing optimal protection for EOD/IEDD operators from the flame associated with blasts from explosive devices.

A key feature of the Olympia bomb suit is its zonal armor system, which provides outstanding blast protection with maximum mobility, flexibility and comfort. The highest protection level is afforded to life-critical areas of the body, such as the neck, chest and groin, with STANAG 2920 V50's ranging from 1,900 m/sec to 450 m/sec. These levels of protection can be adjusted to suit individual customer's needs.

BOMB SUPPRESSION KIT WITH SAFETY CIRCLE

The United Shield Bomb Suppression Blanket and Safety Circle has been designed to provide a portable flexible, lightweight and compact means of protection from EOD and IEDD devices. It is tough and durable, being manufactured from multiple layers of treated aramid ballistic fabric sewn into a fire retardant and water repellent outer cover. It can be quickly and easily folded for storage in the water repellent carry bag, while robust webbing carry handles make for ease of transportation and rapid deployment.
